Professional Summary

Dedicated Laboratory Scientist with over 6 years of experience in clinical and research lab environments. Skilled in sample preparation, analysis, and reporting in compliance with GLP and ISO standards. Proven record of supporting public health investigations through accurate and timely lab diagnostics. Strong background in microbiology, molecular biology, and quality control.

Core Competencies

- Clinical and Analytical Laboratory Testing
- Quality Assurance & GLP Compliance
- Sample Preparation & Equipment Calibration
- Data Analysis & Interpretation
- Laboratory Information Management Systems (LIMS)
- Molecular Biology Techniques (PCR, ELISA, Western Blot)
- Health and Safety Protocols

Professional Experience

Laboratory Scientist

Health Canada, National Microbiology Laboratory - Ottawa, ON

Mar 2019 - Present

- Conduct molecular and microbiological testing for infectious disease surveillance.
- Prepare detailed lab reports and ensure compliance with national biosafety protocols.
- Maintain lab equipment and participate in QA/QC processes.
- Collaborate with epidemiologists to interpret and communicate test results.

Lab Technician

Public Health Ontario Laboratory - Toronto, ON

Jul 2016 - Feb 2019

- Performed routine diagnostic testing and maintained sample integrity.
- Supported outbreak investigations through rapid processing and reporting.
- Assisted with the validation of new testing procedures and tools.

Education

Bachelor of Science in Microbiology

University of Ottawa, Ottawa, ON | 2016

Technical Skills

LIMS | Excel | PCR Machines | Spectrophotometers | Centrifuges | MS Office | ELISA Analyzers

Certifications

WHMIS | Biosafety Level 2 Certification | ISO 15189 Internal Auditor Training
